EP-2200 SERIES COMMUNICATIONS

EP PROTEC TS YOUR INFORMATION PATHWAYS USING IN-LINE MODULES

- EP communication units absorb and dissipate surge energy within units
- Energy is not shunted to earth ground
- In-line modules protect lines independently
- Protects against differential surges
- Eliminates unwanted high frequency noise
- Utilizes TVS Diode Technology for superior voltage clamping

EP-2200 TELEPHONE SUPPRESSION & FILTERING SPECIFICATIONS			
18		PRODUCT NUMBER	EP2200
		OPERATING FREQUENCY	0 - 4 kHz
•		CONNECTION	RJ11 EMI/RFI filtered jacks
CLAMPING LEVEL	100 V	DIMENSIONS	Length: 4.438"
RESPONSETIME	Approx. 1psec		Width: 1.25" Height: 1.063"
APPLICATION	Is acceptable for analog v	voice telephone communicati	on. (Not for DSL)

EP-2215 TELEPHONE PUNCH DOWN BLOCK SPECIFICATIONS			
CLAMPING LEVEL	100 V	PRODUCT NUMBER	EP2215
RESPONSE TIME	Approx. 1psec	OPERATING FREQUENCY	0 - 4 kHz
APPLICATION	Analog voice telephone communication. (Not for DSL)	DIMENSIONS	Length: 1.25" Width: .375" Height: .75"

^{*}must provide voltages and carrier frequency

EP-2	EP-2225 DSL PROTECTION SPECIFICATIONS	
The and the same of the same o	PRODUCT NUMBER	EP2225
38	OPERATING FREQUENCY	0 - 10 MHz
	CONNECTION	RJ11 EMI/RFI filtered jacks
CLAMPING LEVEL 100 V	DIMENSIONS	Length: 4.438"
RESPONSETIME Approx. 1psec		Width: 1.25" Height: 1.063"
APPLICATION Is acceptable for DSL &	ADSL communications.	

EP-2235 DSL PUNCH DOWN BLOCK SPECIFICATIONS			
CLAMPING LEVEL	100 V	PRODUCT NUMBER	EP2235
RESPONSE TIME	Approx. 1psec	OPERATING FREQUENCY	0 - 10 MHz
APPLICATION	Analog voice tele- phone, DSL & ADSL communications.	DIMENSIONS	Length: 1.25" Width: .375" Height: .75"

EP-2275 ETHERNET PROTECTION SPECIFICATIONS PRODUCT NUMBER EP2275			
2		PRODUCT NUMBER	EP2275
		OPERATING FREQUENCY	0 - 185 MHz
		CONNECTION	RJ45 EMI/RFI filtered jacks
CLAMPING LEVEL	13 V	DIMENSIONS	Length: 4.875"
RESPONSE TIME	Approx. 1psec		Width: 1.375" Height: 1.063"
APPLICATION	Acceptable for data communications up to 100 Mbps transmission.
